Tech

UI/UX

Figma

Frontend

- HTML5, CSS3, JavaScript (ES6+)
- React
- Tailwind CSS, Bootstrap

Backend

- REST API
- PHP
- Python
- Java

Database Management

- MySQL
- Oracle Database

Developer Tools & Platforms

- Git, GitHub
- Visual Studio Code, Cursor
- ChatGPT, Claude, GitHub Copilot
- Hugging Face, Google Colab
- Netlify, Render
- Webflow, WordPress

AI: NLP, LLM, RAG, ML Pipeline

Profile

I'm a recent Computer Science graduate and a self-driven developer focused on building clean, scalable, and user-centered applications. I've spent much of my journey learning independently, continuously expanding my skills in full-stack development, AI, and modern development tools. I specialize in AI and work with both low-code and custom software solutions.

Licenses & certifications

Search Engines for Web and Enterprise Data
Data Warehouse Concepts, Design, and Data Integration
Visual Elements of User Interface Design
Software Development Processes and Methodologies

Full credential list available on LinkedIn:

Projects

VetFractureAI

Developed an AI-powered web application that detects and classifies femoral shaft fractures in veterinary X-ray images using Faster R-CNN, PyTorch, and FastAPI, following AO/OTA classification standards.

Vendhee's Booth

Built a browser-based photo booth web application that allows users to capture/upload photos, apply real-time filters, and generate downloadable customizable photo strips using HTML, CSS, and JavaScript.

Phitopolis Website Revamp

Designed and prototyped a full UI/UX redesign of the Phitopolis website during a 3-month internship by creating wireframes, high-fidelity mockups, and interactive prototypes in Figma to improve usability and user experience.

Education

Bachelor of Science in Computer Science | Mapúa University | 2022-2026
